

Client: Cabo Delgado Biodiversity & Tourism
 Location: Vamizi Island, Mozambique
 Completion: July 2005
 Floor Area: 160m² per house

The lodge consists of 10 individual luxury island beach houses located with maximum privacy between each house. Other structures include central guest areas, service & staff buildings. The design blends in with the natural surroundings through the use of locally available material. The details of the materials are highly finished and crafted. The concept was to provide the level of comfort expected for a high-end tourism operation while not diminishing the sought-after experience of being in a remote and untouched destination
